

# Photo management dashboard for store

## Introduction

On our platform, we will provide a dashboard for each offline store (For our project, the offline store refer to a fashion store in a real building). Vendor can manage commodities and upload photos.(Vendor should be a user of the store dashboard). These photos will be showed on Wechat Official Account app (@yichu), which is almost similar to a user uploads a photo on Wechat Official Account app. These features should be implemented only for website.

## Features

- Create a store account by admin panel (Sign up later on);
- Login in;
- Setting a store (Location/Name/Brand/Avatar(Logo));
- Upload a photo
  - ✧ Create a group
  - ✧ Choose a photo from local
  - ✧ Edit title and description
  - ✧ Preview (we can implement it later on if this feature is complicated )

✧ Upload

✧ Links (This photo can link to a commodity, choose from commodities)

- Managing photos
- Showing photos in our wechat official account (in the future these photos also should be showed on our website and app for iOS and Android as well as user uploaded photos).
